Grant Acceptance

This Grant Acceptance ("**Agreement**") is entered into as of **Jan 31, 2026**, by and between:

Grantor

Intuition Box, LLC
A Delaware limited liability company
EIN: 32-0837219
Address: 2810 N Church St, PMB 276335, Wilmington, Delaware 19802-4447, USA

Grantee

Project Name: IntuRank
Legal Name: Ibraheem Ayoola Busari
Country of Residence: Nigeria
Wallet Address (Ethereum): 0xA09E3Fb12Ef1495A607835778bf1cc5a786A99EB
Email address: inturank@gmail.com

---

1. Grant Purpose

The purpose of this grant is to support the development of **open-source software and/or related contributions** built on or in support of the **Intuition Protocol** ecosystem, including work coordinated through the **Intuition Box DAO** and its associated repositories.

This grant is intended to reward active community participation and contribution.

---

2. Grant Amount & Payment Schedule

- **Total Grant Amount:** 15,000 USDT
- **Payment Structure:** Three (3) equal installments
- **Installment Amount:** 5,000 USDT
- **Payment Frequency:** One installment per month

Payments will be made in **USDT on the Ethereum blockchain** to the wallet address specified above.

3. Milestones & KPIs

Grant payments are **conditional** upon the Grantee meeting the milestones and key performance indicators defined in the attached **Grant KPI Appendix**.

The Grantee agrees to submit the KPI for evaluation within 30 days after each installment.

KPI evaluation shall be conducted in good faith with reasonable consideration of both objective progress and community impact.

Determination of whether KPIs have been met may include subjective assessment as reasonably judged by Intuition Box, LLC and/or its designated representatives.

4. Payment Conditions

- Each installment is earned **independently**.
- Failure to meet KPIs may result in delay or non-payment of future installments.
- No future payments are guaranteed.

5. Open-Source & Licensing

All code produced under this grant must:

- Be released as **open-source**, and
- Be licensed under the **MIT License**, unless otherwise explicitly agreed in writing.

Contributions may initially be developed or reviewed in private repositories within the **Intuition Box GitHub organization** where reasonably necessary to protect business logic, security considerations, or strategic coordination.

Unless otherwise explicitly agreed in writing, all code produced under this grant is expected to be released as open-source under the MIT License upon completion of the relevant KPIs or at such time as determined appropriate through Intuition Box DAO governance.

6. Intellectual Property

Subject to the open-source license above:

- The Grantee retains authorship of their contributions.
- No exclusivity is granted to Intuition Box, the Intuition Foundation, or the Intuition Protocol.
- Upon acceptance of the grant, all code contributions produced under this Agreement shall remain hosted within the Intuition Box GitHub organization on an ongoing basis, subject to the governance processes and reasonable discretion of the Intuition Box DAO.
- Removal of contributions shall, where feasible, result in archival rather than deletion.

---

7. Passthrough & Relationship Disclosure

The Grantee acknowledges that:

- Funding originates from the **Intuition Foundation**.
- **Intuition Box, LLC** acts as an operational and contractual passthrough entity.
- This Agreement does **not** create an employment, agency, fiduciary, or representative relationship.

---

8. Termination

Intuition Box, LLC may terminate this Agreement at any time upon determination that KPIs are not being met or that the grant purpose is no longer being fulfilled.

Termination affects only **future unpaid installments**.

---

9. Governing Law

This Agreement is governed by the laws of the **State of Delaware**, without regard to conflict-of-laws principles.

---

10. Acceptance & Signature

By signing below, the Grantee confirms that they have read, understood, and agree to the terms of this Agreement.

Grant KPI Appendix — Specific Milestones

This appendix forms part of the **Grant Acceptance** between Intuition Box, LLC and the Grantee.

Evaluation Notes:
- KPI evaluation is conducted in good faith.
- Subjective criteria may include code quality, documentation clarity, community usefulness, and alignment with Intuition Protocol values.
- Failure to meet KPIs may affect future installments only.

Note: All KPIs should map to contributions in the **Intuition Box GitHub org** to ensure traceability and alignment with project goals.

KPI Structure

Month 1: Foundation, Stability, and Professional Trust

Primary Theme: Reliability, clarity, and confidence when using IntuRank as a primary research interface.

Deliverables

- **V1.2.0 Stability:** Harden deposit/redemption flows using **TRUST** as the native asset.
- **UI/UX Polish:** Transform the Agent Profile into a reliable research terminal with clear data provenance.
- **Team Expansion:** Onboard a Social Media Intern and Community Moderator to drive educational content.

User Stories

- **User Story 1: The High-Conviction Researcher**
  - **As a** researcher investigating specific on-chain identities.
  - **With** a need for 100% data provenance and transaction reliability.
  - **I want** a hardened V1.2.0 build with stable **TRUST** deposit/redemption flows and internal developer logging.
  - **So that** I can verify claims and execute positions without worrying about UI-driven failures.

- **User Story 2: The New Ecosystem Participant**
  - **As a** newcomer looking to navigate the Intuition network.
  - **With** a balance of **TRUST** and a need for clear guidance.
  - **I want** optimized **Global Feeds** and **Leaderboards** supported by daily educational content from our new Social/Mod team.
  - **So that** I understand the "Rank" and "Reason" behind reputation signals before I stake my capital.

Month 2: Abstraction, Efficiency, and Infrastructure

Primary Theme: Reducing protocol complexity through the MultiVault Wrapper while enabling sustainable infrastructure.

Deliverables

- **MultiVault Wrapper:** Design and deploy a contract to handle complex routing and consistent curve defaults (`curveId=4`).
- **Soft Monetization:** Introduce a transparent protocol fee on IntuRank transactions to support long-term development.

User Stories

- **User Story 3: The Efficiency-Driven Power User**
  - **As a** user who wants to interact with multiple reputation markets simultaneously.
  - **With** a desire to avoid manual configuration like `curveId` selection or gas assumptions.
  - **I want** a **MultiVault Wrapper** that enforces a fixed **curveId = 4** and uses **TRUST** as native gas.
  - **So that** I can perform batch operations and route interactions faster and safer than using a generic interface.
- **User Story 4: The Strategic Participant**
  - **As a** participant looking to capitalize on the **progressive offset curve**.
  - **With** an eye on maximizing the profitability of my entry points.
  - **I want** a transparent UI breakdown showing the **protocol fee** versus the net amount routed to the vault.
  - **So that** I clearly understand how my fees support IntuRank's infrastructure while ensuring my own profitability metrics remain clear.

Month 3: Advanced Intelligence and Flagship Maturity

Primary Theme: Establishing IntuRank as a flagship, self-sustaining "Bloomberg Terminal" for Intuition.

Deliverables

- **Premium Analytics:** Introduce advanced ranking views and optional "Power User" tools.
- **Ecosystem Integration:** Collaborate with the Intuition team to position IntuRank as the default advanced interface.

User Stories

- **User Story 5: The Professional Alpha-Seeker**
    - **As a** professional-grade reputation strategist.
    - **With** established workflows and a need for deeper "Alpha" than the standard Portal provides.
    - **I want** access to **optional premium analytics** and advanced ranking views.
    - **So that** I can discover "under-vaulted" high-signal claims before they reach the mainstream ecosystem.
- **User Story 6: The Ecosystem Partner (e.g., Nexura Team)**
    - **As a** protocol lead with a community launching on Mainnet.
    - **With** a user base that requires a vetted, production-grade research surface.
    - **I want** to point my users to IntuRank as the "default advanced interface".
    - **So that** my community has a reliable, maintained terminal to navigate trust across the Intuition network.

Audit trail
